

**Bags that carry  
more than just  
your things – they  
carry a cause.**

## Vision

Eco-Stitch makes **unique**, hand-sewn bags out of unusable, recycled jeans. Eco-Stitch stands for sustainability and minimising consumption. This campaign shows that one bag is enough and that these bags are **perfect** for all sorts of things.

## Target Audience

Young individuals who are into fashion, shopping second hand, and like to be creative with their style. Those who are conscious of the environmental impact of clothing production and fast fashion, or would like to start taking action.

The booklet is made to raise awareness on the environmental impact of our purchases.

Highlighting sustainability in a fun way, using colours and illustrations.

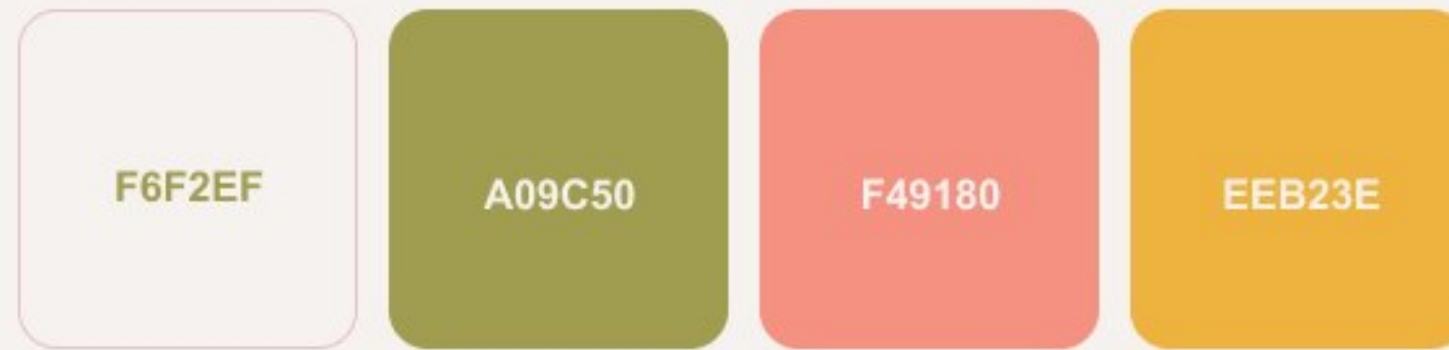

It showcases multiple ways the bags can be used for with the aim of getting people to buy less and use what they have.

The booklet is made to be printed on an A4 paper and folded, producing no access paper waste, and binded together with a thread, just like the bags, made for easy removal and recycling.
